

8133 Air LED

DESIGN: JUKKA SETÄLÄ

Air LED offers first class illumination for the modern office. Using the latest LED technology it emits a warm, pleasant light just where it is needed and consumes only 13 Watts.

You may never have to change a lamp again. Air LED will operate for 25 years in a regular office setting or more than 5 years in continuous use. Welcome to the future.

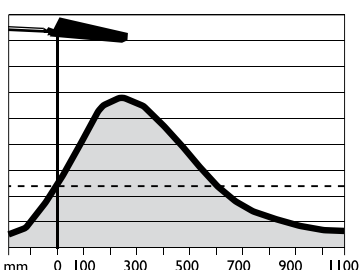

TECHNICAL INFORMATION 8133 AIR LED

State of the art Light Emitting Diodes and precision optics ensures uniform and glare free illumination across the work surface. A proprietary LED-driver automatically adjusts for power fluctuations, thus preventing peak currents from harming the system. It also optimizes the lifetime of the LEDs by adjusting for hot environments. The spring balanced arm (600 mm or 800 mm) ensures that Air LED is easily adjustable and the head always remains parallel to the work surface. Choose the Air variant that suits your working desk size.

Light source: LUXEON K2 LED
 Arm length: 600 / 800 mm
 Standard with table bracket. Optional table base.

Colours:

AIR LED WITH BRACKET	COLOUR	ARM LENGTH	WATT	TOTAL WATTS
