

CALYPSO

CALYPSO is an asymmetric desk lamp for the modern office. Suitable for workplaces with medium-sized desks.

Thanks to its asymmetric reflector this task light provides workplace lighting that is free from reflections and glare. A version fitted with a louvre is available. The parallel arm with its enclosed springs offers easy adjustment of the lamp to the right position. The head always remains parallel with the work surface. The luminaire is supplied as standard with desktop clamp.

Light output without cross-blades.
