

CIRCUS

CIRCUS is a very flexible and state-of-the-art magnifier. Ideal for environments where aesthetics are a high priority.

The arm is easy to adjust, remaining stable in all positions. The state-of-the-art light source encircles the large magnifying lens producing perfect working illumination and adding precision to your work. The light source emits very little heat, maximising patient comfort. A flip over cover protects the primary lens from dust and abrasion when not in use.
